

THE JIKEI UNIVERSITY SCHOOL OF MEDICINE

Elective Programme Feedback Form

Please give us your feedback on your elective experience. Your opinion is vital for us to improve our elective programme for future students. Please ensure to submit this form ONE WEEK BEFORE the end of your attachment to Professor Fukuda (fukuda@jikei.ac.jp).

This feedback form will count towards your formal assessment. (Prof. Fukuda's office can be found on the 6th floor, Takaki Building. Telephone extn 3360.)

Student Name: ANNA NAITO

Japanese Fluency: Native Proficient Intermediate Elementary None
[Attachment 1] From 21/07/15 To 11/09/15 Department NEUROLOGY
[Attachment 2] From To Department
[Attachment 3] From To Department

(1) What did you enjoy most during your elective?

I enjoyed following a lot of the patients' full stay at hospital, especially those with chronic conditions.

(2) Were there any difficulties/problems/surprises during your elective? (e.g. ethical dilemma)

I was surprised with the amount of emphasis placed in explaining to the family members what was happening to the patient. In the UK if the patient has capacity, we need to ~~ask~~ ask him/her permission to talk to their family.

(3) Please circle the appropriate score for the following items:

Hospitality	<u>Excellent</u>	Satisfactory	Unsatisfactory
Accommodation	Excellent	Satisfactory	Unsatisfactory <i>not relevant</i>
Educational supervision	Too much	<u>Sufficient</u>	Too little
Academic work load	Too much	<u>Sufficient</u>	Too little
Time spent on wards/clinics	<u>Too much</u>	Sufficient	Too little
Assessment	Too tough	<u>Appropriate</u>	Too easy

(4) Did you achieve the aims of your elective?

(5) What can be changed to improve our elective programme?

I didn't have access the ER, ICU, or operating theatre women's changing rooms when I first started. I think it would be helpful to organise access to these places before the start of the rotation.

(6) Please feel free to add any further comments in the space provided below.

The department was very welcoming and I felt very integrated into the team by the end of my 2 month rotation at Jikei.

I was also interested in what the rehabilitation doctors do and endovascular surgery, and the professor very kindly introduced me to the right people and let me shadow them for a few days. I feel that this flexibility broadened the scope of what I could learn at Jikei and am very thankful for that opportunity.

**NB) All or part of your comments may be published in our school newspaper/journal or on our university intranet. This is to enable other students/medical school staff to appreciate your feedback. Should you wish your comments to be kept confidential, please inform Prof. Fukuda upon submission of this form.
Thank you very much for your cooperation!**
